

Attorney Docket No.: 47232.5003/00US  
Application No.: 10/534,424  
Amendment Dated: September 22, 2006  
Reply to Office Action: August 29, 2006

**IN THE SPECIFICATION**

Please amend the specification as shown:

Please replace the previously submitted Sequence Listing with the attached substitute sequence listing.

Please delete the paragraph on page 4 lines 11-18 and replace it with the following paragraph:

Figure 1 shows a comparison of deduced amino acid sequences of human ZHX3 (SEQ ID NO: 1) with human ZHX1 (SEQ ID NO: 36). The amino acid sequences of ZHX3 and ZHX1 are compared. Two Znf and five HD motifs were shown by plus signs and underlines, respectively. Asterisks indicate the similarity of amino acid sequence. Dashed lines show gaps when corresponding amino acids are absent in each protein. The deduced amino acid sequences of clone G58, G23 and KIAA0395 corresponding to amino acid sequence between 114 and 642, between 242 and 615 and between 495 and 956 of human ZHX3, respectively, are included in Figure 1.
